Board of Land  
and Natural Resources  
Honolulu, Hawaii

Request for Approval of Special Activity Permit 2009-31 for Mr. Eric Whiteman,  
Nanakuli High School, and Designated Assistants

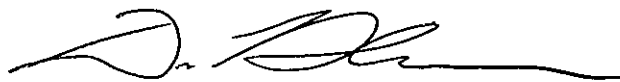

The applicant proposes to collect marine life specimen from State waters for use in his high school biology program and limu removal and restocking projects. Mr. Whiteman requires this permit because State law prohibits the taking of coral and live rock. State law also prohibits the taking of *Gracilaria salicornia*, an invasive non-native algae species. Mr. Whiteman is interested in raising corals and live rocks at Nanakuli High School as part of this biology program. The taking of *G salicornia* is for removal of this invasive species to allow other native species to grow. This request represents a renewal of a permit issued last year.

The Division of Aquatic Resources has reviewed this application and supports Mr. Whiteman's work with the community and students of Nanakuli High School.

RECOMMENDATION:

"That the Board authorize and approve, with stated conditions, this Special Activity Permit for Mr. Eric Whiteman."

Respectfully submitted,

DAN POLHEMUS  
Administrator

## CONDITIONS

### PART I. **GENERAL**

A. This permit becomes effective when the following process is completed.

1. Each assistant must be listed at the end of this permit.
2. The permittee and each assistant must read the permit completely; and must acknowledge understanding of and agreement to abide by conditions of the permit, by signing *both* copies of the permit in the spaces provided.
3. *Both* copies of the permit with permittee's and assistants' signatures must be returned to the Division of Aquatic Resources (the Division).
4. The permit becomes valid when signed by an authorized **representative** of the Department; the Department will return one validated copy to the permittee.
5. The permittee agrees to notify the Division immediately of any change in assistants. Additional persons may be added as assistants by validation: each must sign an "Attachment" form, which must be returned to the Division for validation; once approved, such persons are added to the permit.

B. The permittee agrees to obtain written approval of the Division prior to conducting any activity which would be prohibited under the permit (i.e. request in advance changes to permit conditions).

C. This permit does not make the Board of Land and Natural Resources or State of Hawai'i liable in any way for claim of personal injury or property damage which may result from activity authorized by this permit; the permittee and all assistants agree to hold the Board and State harmless against any and all claims of injury, death or damage resulting from actions or omissions under this permit.

D. This permit conveys authority **ONLY** of the Department relating to the Division's jurisdiction over aquatic resources: the permittee remains responsible for obtaining all other prior permission from other applicable authorities (such as owners of and tenants upon private lands; other divisions of the Department; other local, State and Federal agencies--this permit authorizes collecting organisms protected by Federal law only with appropriate Federal authorization).

- E. The permittee and also each assistant is individually responsible and accountable for his or her actions while performing activities authorized by this permit; the permittee is additionally responsible and accountable for the actions of each assistant.
- F. This permit is neither transferable nor assignable to another person.
- G. The permittee or assistant must carry a copy of this permit on location while performing activities authorized by this permit.
- H. Authority granted by this permit ends on the "Expiration Date" on the first page of this permit; within **one month** of the expiration date, the permittee agrees to **return this permit** to the Division **with a Collecting Report completed for the full duration of this permit**, reporting results of *all* collecting under this permit on the form provided with this permit.
- I. The permittee and assistants agree to provide access to data obtained under this permit upon request of the Division, to provide the Division one copy of each report prepared with such data and published for distribution, and to allow Department staff to inspect on permittee's premises organisms collected under this permit.
- J. Violation of any condition of this permit by any person may be cause for immediate revocation of the permit; the person responsible may be subject to penalty as provided by law; violation may be cause also for denial of future permit applications.
- K. The permittee may request change of a condition or conditions of this permit by writing to the Division; if approved by the Department, the Division will issue an attachment ("Amendment") which shall become part of, and amend terms of, this permit. The Department may impose additional conditions to, or restrictions of, this permit by written notice to the permittee.

3. **COLLECTING PRACTICES:** The permittee is responsible for persons engaging in activities under this permit behaving professionally and responsibly, in a manner which does not generate conflict with public or private sectors, including fishing and dive-tour industries and local communities.
- a. Collecting activities under authority of this permit must be supervised directly, on site, by either Eric Whiteman or his appointed representative (who must be a signatory of this permit).
  - b. An approved alien species protocol will be filed with DAR prior to initiation of collection activities. Protocol will include mechanisms for ensuring that the individuals listed on this permit do NOT serve as vectors for the transport or introduction of alien species through their activities. Furthermore, a specific protocol will be approved by DAR prior to any work, removal, or disposal of alien seaweeds, as listed under this permit.
  - c. **No extractive or invasive sampling will be done on any intact coral colony measuring larger than 1 m x 1 m x 1 m.** Specific efforts will be made to avoid damage to any large colonies of coral.
  - d. Except as specified expressly in an approved collecting plan, no organism unlawful for taking or possession by reason of size, under law or administrative rule, may be collected or utilized under this permit.
  - e. No coral species other than those expressly listed on this permit will be collected or impacted by activities conducted under this permit.
  - f. The Division may require the permittee to accommodate presence of an observer specified by the Division during collection and research activities. A record will be kept of each collection comprising specific location, date, species and amount collected. This record will be made available to the Division upon request.
4. **NOTICE:**
- a. Collecting Generally - the permittee must give notice, in a form specified by the Department, to the O'ahu DAR office and to the O'ahu office of the DLNR's Division of Conservation and Resource Enforcement (DOCARE), at least 2 hours prior to initial commencement of any coral or live rock collection activity under this permit.
  - b. Mass mortality - the permittee must notify DAR O'ahu within one day of
    - 1) Any instance of major damage caused to coral or other marine natural resources as a result of collection or other research activities conducted under this permit.

- 2) Any un-planned mass die-off of collected material after field collection.

c. **Fragmentation** - This permit provides for collection of live coral through selective breakage of portions of a live colony (fragmentation) in such a manner as does not result in any additional harm to the remainder of the colony.

d. **Rare Species** - The following *Porites*, *Pocillopora*, and *Montipora* species require special permission from DAR prior to collection, take, or disturbance of any kind under this permit: *Porites pukoensis*, *Porites duerdeni*, *Porites studeri*, *Pocillopora ligulata*, *Pocillopora molokensis*, *Montipora dilitata*.

5. **GEAR AND METHODS**

Use of any chemical substances pursuant to Section 188-23, Hawai'i Revised Statutes, electrical shocking devices, or explosives remains expressly prohibited.

6. **USE OF ORGANISMS:** Live organisms and live rock taken from Hawai'i waters under authority of this permit may be used only for scientific study on O'ahu, except as authorized by prior written approval of the Division:

- a. Organisms collected under authority of this permit may not be used for personal consumption or sale; organisms collected under this permit may not be traded, bartered or loaned to other individuals, institutions or entities;
- b. Written approval must be obtained from the Division prior to
  - 1) Purchasing or any other acquisition of regulated organisms (regardless of origin) alive from any other party;
  - 2) Transporting any live organism (regulated or not) between islands, or outside of West O'ahu;
  - 3) Exchanging or donating any organisms collected under this permit to any other person, party or organization.
- c. The permittee may not convey in any fashion (including, but not limited to, selling, trading, or giving) any coral or live rock to any person or party in Hawai'i which does not already have a permit from the Department authorizing possession of same and without direct, written approval from the Division;
- d. The permittee is allowed to hold the species listed on this permit (with the exception of the alien seaweed) for educational and scientific purposes at Nanakuli High School.

7. **ANNUAL REPORT:** Upon expiration, the permittee must provide to the Division a final written report summarizing results of collecting activity carried out under this permit and the analysis of the data:
- a. The annual report should provide a written explanation as to how the collection of a fully-protected marine species for scientific study is benefiting the State of Hawai'i in general and specifically, the improved management of the species.
  - b. The final report must describe, in form specified by the Department,
    - 1) Names and total numbers/quantities of all specimens collected under this permit,
    - 2) Their dispositions (e.g. on display; released/returned to the ocean; died),
    - 3) **Description of any additional benefits** beyond the scientific analysis provided to the Division or the public during the period;
  - c. An inventory of organisms (dead or alive) present at the facility or with the permittee the end of the report period, in form acceptable to the Division, must accompany the annual report;
  - d. **The annual report is due at the Division's Honolulu office within one calendar month after expiration of the permit, and is required prior to any renewal of this permit.**
